MEMORANDUM FOR: Distribution

**FROM:** Catrina D. Purvis

NESDIS Chief Information Officer (Acting)

**SUBJECT:** Issu ance of Updated NESDIS Information Technology

Security Policies and Procedures

This is to announce the issuance of ten updated NESDIS publications for implementing effective, compliant, and consistent information technology (IT) security practices within NESDIS. These documents highlight the specific steps necessary to ensure effective NESDIS implementation. Specifically issued under this memorandum are the

- 1. NESDIS Federal Information Processing Standard 199 Security Categorization Policy and Procedures, v3.0;
- 2. NESDIS Plan of Action and Milestones Management Policy and Procedures, v2.0;
- 3. NESDIS Policy and Procedures for Determining Minimum Documentation Requirements for System/111erconnections, v2.1;
- 4. NESDIS Contingency Planning Policy and Procedures, v2. 1;
- 5. NESDIS Policy and Procedures for Ensuring Security i11 NESDIS IT Systems and Services Acquisitions, v2. 1;
- 6. NESDIS Security Assessment Report Policy and Procedures, v2.0;
- 7. NESDIS Federal Information Security Management Act (FISMA) Inventory Management Policy and Procedures, v2.0;
- 8. NESDIS IT Security Training Policy and Procedures, v2.1;
- 9. NESDIS Continuous Monitoring Planning Policy and Procedures, v2. 1; and the
- 10. Practices for Securing Open-source Project for a Network Data Access Protocol Server Software 011 NESDIS Information Systems, v3.1.

These publications are part of the NESD IS-wide effort to maintain and enhance its foundation of NESD IS IT security policies and implementation practices that align with the latest Department

NESDIS Quality Procedure [NQP] – 3403 Revision 3.1

Effective Date: Expiration Date:

September 1, 2012 Until Superseded

of Commerce and NOAA policies, requirements, and standards. I wish to thank all who contributed reviewing and commenting on the drafts prior to publication to ensure that they are complete, current, and meaningful. These documents will be posted to the Chief Information Division's Web site at <a href="https://intranet.nesdis.noaa.gov/ocio/it\_security/handbook/itsecurityhandbook/itsecurityhandbook.php">https://intranet.nesdis.noaa.gov/ocio/it\_security/handbook/itsecurityhandbook/itsecurityhandbook.php</a>. If you have any questions, please contact the NESDIS IT Security Officer, Nancy Defrancesco, at Nancv.DeFrancesco@ noaa.2ov or phone (301) 713-1312.

September 1, 2012 Until Superseded

# NESDIS FIPS 199 SECURITY CATEGORIZATION POLICY AND PROCEDURES

# **Record of Changes/Revisions**

| Version                | Date      | Section   | Author | Change Description  |
|------------------------|-----------|---|--------|---|
| Draft 1.0              | 6/19/2009 | All   | Noblis | Draft   |
| Draft 2.0              | 6/22/2009 | All   | ITSO   | Initial Review  |
| Draft 3.0              | 6/22/2009 | All   | Noblis | Incorporation of ITSO<br>Revisions  |
| Draft 3.1              | 8/19/2009 | All   | ITSO   | Incorporation of NESDIS ISSO comments   |
| Pre-final<br>Draft 3.2 | 9/15/2009 | 3.1, 7.0, 7.1.4.1                               | ITSO   | Incorporate NESDIS-wide comments and issued prefinal draft for final comments |
| Final v1.0             | 9/30/2009 | Date  | ITSO   | Finalize  |
| Draft v1.1             | 8/15/2011 | Headers, footers,<br>Appendix B,<br>terminology | ITSO   | FY2011 review and update  |
| 2.0 final              | 9/01/2011 | All   | ITSO   | Removed Draft markings and finalized  |
| 3.0                    | 9/01/2012 | 7.1.3, 7.1.4.2                                  | ITSO   | FY2012 review and update  |

September 1, 2012 Until Superseded

#### 1.0 Background and Purpose

The Federal Information Security Management Act (FISMA), 44 U.S.C. § 3541, *et seq.*, directed the promulgation of federal standards for the security categorization of federal information and information systems based on objectives of providing the appropriate levels of information security according to a range of risk levels. The Federal Information Processing Standards (FIPS) Publication 199, entitled *Standards for Security Categorization of Federal Information and Information Systems*, establishes those federal standards.<sup>1</sup>

The purpose of this document is to provide NESDIS-specific policies and procedures for implementing FIPS 199.

#### 2.0 Scope

The scope of this document is limited to NESDIS-specific procedures for 1) determining, 2) documenting, 3) obtaining Information Technology Security Officer (ITSO) review and Authorization Official (AO) approval of, and 4) complying with FIPS 199 security categorization requirements.

#### 3.0 Roles and Responsibilities

#### 3.1 Authorizing Official (AO)

The AO is responsible for approving the FIPS 199 security categorization.

#### 3.2 Information System Owner (SO)

The SO is responsible for preparing, updating, and meeting all NESDIS FIPS 199 security categorization requirements identified in this document. The SO may however; delegate FIPS 199 activities to the Information System Security Officer (ISSO).

#### 3.3 Information Owner (IO)

The IO is the agency official with statutory and/or operational authority for protecting specified information. The IO is responsible for informing the SO of all information types for which they are responsible and identifying any unique requirements for the protection of that information, including the controls for its generation, collection, processing, dissemination, and disposal.

#### 3.4 Information Technology Security Officer (ITSO)

The ITSO is responsible for performing quality reviews of all FIPS 199 documents and artifacts prior to submission for AO approval.

#### 3.5 Information System Security Officer (ISSO)

The ISSO is responsible for maintaining the appropriate security posture of the system in accordance with the approved FIPS 199. The ISSO is also responsible for performing additional FIPS 199 activities, as delegated by the SO.

#### 4.0 Management Commitment

The NESDIS Chief Information Division (CID) supports the NESDIS Assistant Administrator's (AA's) strong emphasis on securing NESDIS information and information systems. Through the issuance of this policy and procedures document, the NESDIS Chief

September 1, 2012 Until Superseded

#### **Information Division**

(CID) demonstrates its commitment to implementing a cost effective IT Security program with a standard approach to implementing the FIPS 199 security categorization process. This issuance also demonstrates CID commitment to ensuring that FIPS 199 documentation and artifacts submitted to any NESDIS AO for approval provide sufficient basis for a fully informed risk acceptance decision.

#### 5.0 Compliance

The NESDIS ITSO monitors – through periodic quality reviews and monthly performance metrics – implementation of the Assessment and Authorization (A&A) process within NESDIS to ensure compliance with applicable laws, directives, policies, and guidance. The ITSO reports to the AA monthly, and to the CIO and Office Directors as necessary regarding compliance. The AA, Chief Information Officer, and/or Office Directors may initiate actions as necessary to correct reported deficiencies, including reallocation of resources to improve implementation of security practices, or removal of an individual from their role as AO, SO, ITSO, or ISSO.

#### **5.1 References**

- DOC Information Technology Security Program Policy (ITSPP), section 4.14.2 (January 2009)
- NIST Special Publication (SP) 800-60 Revision 1, Guide for Mapping Types of Information and Information Systems to Security Categories: Volume I and Volume II (August 2008)

#### 6.0 NESDIS FIPS 199 Policy

As required by DOC ITSPP section 4.14.2, the NESDIS-specific FIPS 199 process and procedures shall align with the FIPS 199 and NIST SP 800-60 prescribed practices for the determining the security categorization of systems. This document provides NESDIS-specific procedures for implementing FIPS 199 and NIST SP 800-60 and should be used as companion document for implementation within NESDIS and not as a replacement document.

#### **6.1 Policy Maintenance**

The NESDIS ITSO shall review this policy and procedures biennially and update as necessary to reflect implementation challenges and new requirements. All updates to this policy shall be subject to a NESDIS-wide vetting process providing an opportunity for stakeholders to comment on the programmatic implications of updates.

#### **6.2 Policy Feedback Process**

NESDIS personnel are encouraged to notify the ITSO by e-mail to <a href="mailto:nesdis.it.security@noaa.gov">nesdis.it.security@noaa.gov</a> regarding any errors found in the document or other clarifications or updates that are required.

#### **6.3 Policy Effective Date**

This policy is effective upon issuance.

#### 7.0 Procedures

Implementing the FIPS 199 security categorization of information and information systems is a critical first step of the NESDIS risk assessment process. Performing the FIPS 199 as a part of the risk assessment enables security to be planned, acquired, built in, and deployed as an integral part of a system early and throughout the system development life cycle (SDLC).

Effective Date: September 1, 2012

Expiration Date: Until Superseded

The procedures below provide step-by-step instructions for implementing FIPS 199 using the NESDIS required FIPS 199 template provided at Appendix A of this document (current versions of templates used in NESDIS can be found on the NESDIS IT Security Handbook website at:

https://intranet.nesdis.noaa.gov/ocio/it\_security/handbook/it\_security\_handbook.php).

#### 7.1 Determining FIPS 199 Information and Information System Security Categories

#### 7.1.1 Required Input

The SO must identify the following prior to performing the FIPS 199 part of the risk assessment.

- A high level system description, including the purpose of the system. The SO may reference the System Security Plan description of the system environment and the Business Impact Analysis for additional information regarding the importance/criticality of the system to the overall mission and the logical and physical partitioning of service enclaves within the environment.
- A general characterization of the information which will be stored, processed, or transmitted by the system. The SO may reference interconnection agreements and requirements documents to ensure all information types shared/exchanged are identified.
- Information security and data protection requirements that are unique for a
  specific information type, as dictated by the IO, if applicable. In a serviceoriented architecture, the system environment may be partitioned into several
  enclaves with different security categorizations or with the same
  categorizations but different function. These differences and the services
  supported by the partition may affect the determination of the security
  controls requirements baseline and tailoring.

#### **7.1.2 Documenting Information Types**

The SO must meet with all IOs in the selection of information types defined in the NIST SP 800-60, Volume II, Appendices C and D,<sup>2</sup> and select on the FIPS 199 all of the information types which will be stored, processed, or transmitted by the system. The "Impact Level Assessment Table" provided in the NESDIS FIPS 199 template lists all NIST SP 800-60 identified information types. The SO must place a checkmark (i.e., X) in the left column of the "Impact Level Assessment Table" next to each selected information type.

#### 7.1.3 Documenting Impact Level Assessments

The SO must review the provisional impact level assignments provided in NIST SP 800-60 for each selected information type. These provisional impact level assignments are also identified in the NESDIS FIPS 199 template for SO convenience. Compliant with NIST SP 800-60 guidance on existence of exceptions to provisional impact level assignments, the SO must use the "Assessment of Impact" columns of the "Impact Level Assessment Table" to document the system-specific impact level assessment (High, Moderate, or Low) for the Confidentiality, Integrity, and Availability of each selected information type.

Note, however, that the rationale for all deviations from the NIST provisional impact level assignments must be documented in the "Summary Analysis" section of the NESDIS FIPS 199 template described in section 7.1.4.2 of this document.

Review other documents including Interconnection Security Agreements, Business Impact Analysis, interface requirements documents, and critical infrastructure system interdependencies to understand and align with the sensitivity of the system's information types from the perspective of customers and other users of the information.

Figure 1.0 below depicts an excerpt of the "Impact Level Assessment Table" provided in the NESDIS FIPS 199 template to be completed.

|   |         | NIST 800-60 Categorization of Information           |          |          |          | <noaa50xx> Assessment of Impact</noaa50xx> |                      |                         |
|---|---------|---|----------|----------|----------|--|----------------------|-------------------------|
|   |         | Information Types for this System / Application(s): | C-Impact | I-Impact | A-Impact | C-Impact                                   | I-Impact             | A-Impact                |
| X |         | MISSION-BASED INFORMATION                           |          |          |          | Confidentiality<br>(H/M/L)                 | Integrity<br>(H/M/L) | Availability<br>(H/M/L) |
|   | D.8     | ENVIRONMENTAL MANAGEMENT                            |          |          |          |  |                      |                         |
|   | D.8.1   | Environmental Monitoring/Forecasting                | Low      | Moderate | Low      |  |                      |                         |
|   | D.8.2   | Environmental Remediation                           | Moderate | Low      | Low      |  |                      |                         |
|   | D.8.3   | Pollution Prevention And Control                    | Low      | Low      | Low      |  |                      |                         |
|   | D.19    | GENERAL SCIENCE & INNOVATION                        |          |          |          |  |                      |                         |
|   | D.19.1  | Scientific and Tech Research and Innovation         | Low      | Moderate | Low      |  |                      |                         |
|   | D.19.2  | Space Exploration and Innovation                    | Low      | Moderate | Low      |  |                      |                         |
|   |         | MANAGEMENT & SUPPORT INFORMATION                    |          |          |          |  |                      |                         |
|   | C.3.2   | FINANCIAL MANAGEMENT                                |          |          |          |  |                      |                         |
|   | C.3.2.1 | Asset and Liability Management                      | Low      | Low      | Low      |  |                      |                         |
|   | C.3.2.2 | Reporting and Information                           | Low      | Moderate | Low      |  |                      |                         |
|   | C.3.2.3 | Budget and Finance                                  | Moderate | Moderate | Low      |  |                      |                         |
|   | C.3.3   | HUMAN RESOURCES                                     |          |          |          |  |                      |                         |
|   | C.3.3.4 | Resource Training and Development                   | Low      | Low      | Low      |  |                      |                         |
|   | C.3.3.5 | Security Clearance Management                       | Low      | Moderate | Low      |  |                      |                         |
|   | C.3.3.6 | Staff Recruitment and Employment                    | Low      | Low      | Low      |  |                      |                         |
|   | C.3.5   | INFORMATION & TECHNOLOGY MANAGEMENT                 |          |          |          |  |                      |                         |
|   | C.3.5.1 | System Development                                  | Low      | Moderate | Low      |  |                      |                         |
|   | C.3.5.2 | Lifecycle / Change Management                       | Low      | Moderate | Low      |  |                      |                         |
|   | C.3.5.3 | System Maintenance                                  | Low      | Moderate | Low      |  |                      |                         |
|   | C.3.5.4 | IT Infrastructure Maintenance                       | Low      | Moderate | Low      |  |                      |                         |
|   | C.3.5.5 | IT Security   | Low      | Moderate | Low      |  |                      |                         |

Figure 1— Impact Assessment Table Excerpt

#### 7.1.4 Required Output

The SO must document and complete the remaining sections of the NESDIS FIPS 199 template as follows:

Effective Date: September 1, 2012

Expiration Date: Until Superseded

#### 7.1.4.1 Designated Contacts

The SO must provide contact information for the following roles in the NESDIS FIPS 199 template:

- Authorization Official (AO) or co-AOs
- Information System Owner (SO)
- Information Owner (IO)
- Information Technology Security Officer (ITSO)
- Information System Security Officer (ISSO)

The information depicted below in Figure 2 must be provided for each role identified above.

| Name          |  |
|---------------|--|
| Role          |  |
| Title         |  |
| Agency        |  |
| Address       |  |
| Email address |  |
| Phone number  |  |

Figure 2 – Required FIPS 199 Contact Information

#### **7.1.4.2 FIPS 199 Analysis**

The SO must complete the Summary Analysis section of the NESDIS FIPS 199 template in the format identified below in Figure 3. If the system environment contains partitions of different security categorizations, then document the partitioning in separate sections of the FIPS 199 analysis.

Effective Date: September 1, 2012

Expiration Date: Until Superseded

#### FIPS 199 Analysis for <NOAA50xx>

[Provide the breakout of the information and mission types identified in the checklist in the format identified below.]

The <NOAA50xx> system contains the following Security Categorization of Service Delivery Support Information (NIST SP 800-60, Revision 1, Volume II, Appendix C) and/or Mission Information (NIST SP 800-60, Revision 1, Volume II, Appendix D). The default security impacts were selected for all NIST SP 800-60 information and mission types.

 $SC_{C...2.1.3\ Program\ Monitoring} = \{(confidentiality, Low), (integrity, Low), (availability, Low)\}.$ 

SC <sub>D.4.1 Disaster Monitoring</sub> = {(confidentiality, **Low**), (integrity, **High**), (availability, **High**)}.

Therefore, the overall security impact of the <NOAAnnnn> system is:

 $SC < NOAAnnnn >= \{(confidentiality, Low), (integrity, High), (availability, High)\}$ 

The high watermark security impact for the system overall is **High**.

#### Disaster Monitoring Service Enclave

The high watermark security impact for consideration in the FIPS 200 evaluation of the Disaster Monitoring Service enclave is **High**. The Disaster Monitoring Service enclave data supports DOC Primary Mission Essential Functions (PMEFs) and loss of integrity or availability could jeopardize lives and property. Also, the integrity of the disaster program performance measurement data must be maintained to create reliable statistics for oversight committee and public information regarding program performance effectiveness.

#### **Program Monitoring Service Enclave**

The high watermark security impact for consideration in the FIPS 200 evaluation of the Program Monitoring Service enclave is **Low**. The Program Monitoring Service enclave consists of publicly-available websites containing statistical information derived from program performance measurement data. The statistics can be readily recreated from the input data stored in the Disaster Monitoring Service enclave. The enclave provides a data dissemination service to the public via web portal.

Figure 3 - Required Summary FIPS 199 Analysis Information Example

#### 7.2 Obtaining ITSO Review and AO Approval

The SO must complete and document the FIPS 199 using the NESDIS required FIPS 199 template and submit it securely via PGP-encrypted email or hand-deliver to the

Effective Date: September 1, 2012

Expiration Date: Until Superseded

ITSO for compliance review. The ITSO will review and provide compliance assessment results to the SO within five (5) business days of receipt. If the FIPS 199 is determined compliant by the ITSO, the ITSO will assist the SO in obtaining AO approval by helping to coordinate routing among stakeholders for concurrence and providing the AO with their recommendation for approval. If the FIPS 199 is determined non-compliant, the ITSO will provide revision recommendations which must be completed by the SO and resubmitted to the ITSO within 5 business days of their receipt of the comments from the ITSO.

In no case shall the SO submit the FIPS 199 to the AO without obtaining ITSO concurrence. In the event that the SO and ITSO cannot agree on the FIPS 199 security category, they will meet together with the AO to discuss the differences in their assessments.

In all cases, the AO will make the final determination and approval decision. The AO approval must be documented using the FIPS 199 AO Signature Page Template at Appendix B of this document.

#### 7.3 Complying with FIPS 199 Continuous Monitoring Requirements

The system's overall FIPS 199 security category, which is derived from the security impact highest watermark, will provide a basis for the FIPS 200, *Minimum Security Requirements for Federal Information and Information Systems*, analysis. See NESDIS *FIPS 200 Security Control Selection and Tailoring Policy and Procedures* for detailed instructions on how to conduct a FIPS 200 analysis.

NESDIS requires annual SO review, and update if necessary, of the FIPS 199 as part of the annual review of System Security Plans and Risk Assessments. The annual SO review of the FIPS 199 must include a repeat of the procedures identified in section 7.1 and, if necessary, section 7.2 of this document. The SO must also update the FIPS 199 whenever a new information type is added to or removed from the system during the system configuration management process (e.g., addition or change in use of an information collection component to the system environment such as a database or file server).

All FIPS 199 changes require written approval from the AO. The FIPS 199 must, at a minimum, be re-authorized in writing by the AO at least every 3 years as part of the *Monitor Security Controls* Step of the system's assessment and authorization process.

The SO must maintain the FIPS 199 Record of Changes to record the initial issuance and subsequent annual reviews and updates.

# 2. Purpose and Methodology

The purpose of this Federal Information Processing Standard (FIPS) 199 Analysis is to document the security categorization for <SYTEM NAME or ID> in accordance with the Federal Information Security Management Act of 2002 (FISMA). FISMA requires that federal agencies utilize the standards and guidelines issued by the National Institute of Standards and Technology (NIST) to categorize information systems and the information types collected or maintained by or on behalf of each agency. These standards and guidelines are based on the objectives of providing appropriate levels of information security according to a range of risk levels and of recommending the types of information and information systems to be included in each category.

Effective Date: September 1, 2012

Expiration Date: Until Superseded

The security categories are based on the potential impact on an organization should certain events occur which jeopardize the information and information systems needed by the organization to accomplish its assigned mission, protect its assets, fulfill its legal responsibilities, and maintain its day-to-day functions. The system owner must complete the FIPS 199 categorization using NIST Special Publication (SP) 800-60 guidance to categorize the confidentiality, integrity, and availability security objectives for the system's information types. These categorizations are used to establish the high watermark categorization for each security objective that in turn are used to establish the system's overall categorization and the FIPS 200 associated controls baseline. Upon completion of the FIPS 199 table, the system owner must first obtain AO approval, then use this result to establish the high watermark needed to determine the minimum security controls FIPS 200 baseline.

The table in Section 4 provides a checklist for recording the system's information types and selected categorizations for confidentiality, integrity, and availability for each information type. It includes the categorizations as recommended by NIST SP 800-60 as well as the selection or tailoring of the recommended categorization as appropriate for the data and mission types collected or maintained by <SYSTEM NAME or ID>. In addition, the security categorization was determined using the Homeland Security Presidential Directive 7 (HSPD-7), the Patriot Act, and the criteria contained in FIPS 199, which;

"[E]stablishes security categories for both information, and information systems. The security categories are based on the potential impact on an organization should certain events occur which jeopardize the information and information systems needed by the organization to accomplish its assigned mission, protect its assets, fulfill its legal responsibilities, maintain its day-to-day functions, and protect individuals. Security categories are to be used in conjunction with vulnerability and threat information in assessing the risk to an organization."

#### 3. FIPS 199 Analysis for NOAA50xx

[Provide the breakout of the information and mission types identified in the checklist in the format identified below.]

The *NOAA50xx* system contains the following Security Categorization of Service Delivery Support Information (NIST SP 800-60 Revision 1 Volume 2, Appendix C) and/or Mission Information (NIST SP 800-60 Revision 1 Volume 2, Appendix D). The default security impacts were selected for all NIST SP 800-60 information and mission types.

[List ALL information types checked in the table in Section 4]

SC C.1.2.3 Information Type 1= {(confidentiality, high/moderate/low), (integrity, high/moderate/low), (availability, high/moderate/low)}.

SC D.1.2 Information Type 2 = {(confidentiality, high/moderate/low), (integrity, high/moderate/low), (availability, high/moderate/low)}.

Therefore, the overall security impact of the *NOAA0xx* system is:

 $SC\ NOAA50xx = \{(confidentiality, high/moderate/low), (integrity, high/moderate/low), (availability, high/moderate/low)\}$ 

The high watermark security impact for consideration in the FIPS 200 evaluation is [**High, Moderate, or Low**].

co-Authorizing Official and

Title

SUBJECT: Approval of the Federal Information Processing Standard 199

Security Categorization for <system long name>

I/We have reviewed the Federal Information Processing Standard (FIPS) 199 Security Categorization, version x.x dated Month day, 20xx, for <system long name>, System ID NOAA50xx (attached). I/We approve the designation of the system's overall security categorization as <High, Moderate, or Low>. This categorization is based on categorization of the individual security objectives as Confidentiality—<High, Moderate, or Low>, Integrity—<High, Moderate, or Low>.

You are directed to submit for my/our approval, within 30 days of the date of this approval, the security controls baseline for the system prepared in accordance with FIPS 200. The FIPS 200 determination must reflect the cost-effective control requirements that adequately protect the system to this level of security categorization.

You are required to review the FIPS 199, and update it as necessary, at least annually as part of the System Security Plan and risk assessment annual rever of the System Security Plan and risk assessment annual rever of the system during the ongoing an ew information type to, or removing an information type from, the system during the ongoing system configuration management process. Also, you must update the FIPS 199 Record of Changes for each review and update performed. All FIPS 199 changes require my/our written approval, and at a minimum, you must re-submit it for my/our written approval at least every 3 years as part of the system assessment and authorization process, even if there has been no change to the FIPS 199.

You must retain this approval memo as part of the system's security authorization package documentation.
